

# Ensure On-Time & Profitable Hyperlocal Deliveries

Scalable, Customizable SaaS Platform

## 66%

Consumers expect same-hour delivery

## 90%

Consumers track their orders online

## 29%

Consumers change delivery location or time

## The Landscape

With increasing pressure on retailers to offer hyperlocal deliveries to customers, the two major challenges most retailers face are on the fronts of how to uphold committed service levels to customers and how to do it profitably. To add to the complexity, there is a deluge of third-party apps and marketplaces that front-end this process which provides temporary relief to retailers but has long-term implications. Retailers need to find the right balance between keeping hyperlocal delivery options in-house and engaging with third-parties so that they remain in control of their customer experience and understand them better in the long run to continually improve on it.

## Introducing FarEye

FarEye enables enterprises to orchestrate, track, and optimize their logistics operations.

### Control Customer Experience

- Provide estimated time of arrival
